

OUTNUMBERED BUT DEADLY

Combining the talents of two of the most dynamic, confident & raw emcees in the independent Hip-Hop music-scene today, **OBD** contrasts gritty rhymes and vibrant beats in a wild-fusion and sound that's all their own, but designed entirely for all.

Originally formed in 2011, OBD is based out of Rotterdam in the Netherlands and comprised of the joint-forces & lyrical-talents of rappers **Kawil** and **D-tech**. Creating rhythms & rhymes that provoke the mind and stoke the spirit OBD is determined to be the voice of change and ready to lead the people towards a better, more-empowered tomorrow through music.

Together OBD is an undeniable sonic-force and powerful set of voices that are unafraid to put their knowledge, experience & music to work on behalf of the people. Through their own intense bond the rhymes of OBD have the strength, charisma and attitude to be an authentic call for change that the people can genuinely connect with & respond to...they make music that can truly unify and mobilize.

The movement has already begun with the official release of their single: **A Bright Day (feat. Gual Rassi)**. Outnumbered But Deadly - make no mistake, these two emcees are ready to take on the world and ready to take you with them side-by-side into the future of Hip-Hop.
